Subject Index of Volume 53

Adhesion
adhesion and corrosion properties of a new NiZn/ZnCo-coated steel tire cord, 243
Al–Zn coatings
corrosion behaviour of physically vapour deposited Al–Zn coatings on 7075 Al alloy, 99
Aluminium
electrochemical evaluation of the adherence of Zn to Al cathodes, 231
effect of Si in steel on the growth of intermetallic phases during hot dipping in a Zn–5%Al melt, 283
Aluminium alloys
corrosion behaviour of physically vapour deposited Al–Zn coatings on 7075 Al alloy, 99
Anisotropy fields
anisotropy in the compressibility of Mo disulphide up to pressures of 90 kbar, 147
a-C:H films
interfacial phases and the adhesion of amorphous hydrogenated C films deposited by r.f. CVD onto (100) Si, 121

Boron
localized corrosion behaviour of Cr- and B-implanted Ni_3Al, 115

Carbon
structure and wear properties of C implanted 304 stainless steel using plasma source ion implantation, 267
structure–property relationships in dual-frequency plasma deposited hard a-C:H films, 275
Cemented carbide tools
wear of cemented carbide cutting inerts with multilayer Ti-based PVD coattings, 161
Ceramic coatings
wet powder spraying—a process for the production of coatings, 71
Ceramic tools
methodology for adhesion characterization of microwave PECVD diamond films on SiAlON tool inserts, 189
Chemical vapour deposition
characterization study of diamond and diamond-like carbon, 177
influence of CVD conditions on the structural stability and cracking of Si carbide coatings on C–C composites, 137
interfacial phases and the adhesion of amorphous hydrogenated C films deposited by r.f. CVD onto (100) Si, 121
methodology for adhesion characterization of microwave PECVD diamond films on SiAlON tool inserts, 189
understanding the mechanism of CVD diamond, 1
Chromium
a sulfate solution for deposition of Ni–Cr–P amorphous alloys, 203
localized corrosion behaviour of Cr- and B-implanted Ni_3Al, 115
Cobalt
adhesion and corrosion properties of a new NiZn/ZnCo-coated steel tire cord, 243
Corrosion
adhesion and corrosion properties of a new NiZn/ZnCo-coated steel tire cord, 243
corrosion behaviour of ion plated and implanted films, 25
electrochemical potential measurement for monitoring underfilm corrosion of painted steel in 3.5% NaCl solution, 185
study of Zn–Ni and Zn–Co alloy coatings electrodeposited on steel strips II: Corrosion, dezincification and sulfidation of the alloy coatings, 35
Corrosion resistance
field and laboratory corrosion tests on Zn–Ni alloy coatings, 171
formability and corrosion resistance of TiN-coated stainless steel sheet, 153

Dezincification
study of Zn–Ni and Zn–Co alloy coatings electrodeposited on steel strips II: Corrosion, dezincification and sulfidation of the alloy coatings, 35
Diamond
characterization study of diamond and diamond-like carbon, 177
understanding the mechanism of CVD diamond, 1
Diamond films
methodology for adhesion characterization of microwave PECVD diamond films on SiAlON tool inserts, 189
Diamond-like carbon
characterization study of diamond and diamond-like carbon, 177

Electrochemical potential
electrochemical potential measurement for monitoring underfilm corrosion of painted steel in 3.5% NaCl solution, 185
Electrodeposition
properties of electrodeposited Ni–Mo alloy coatings, 257

Hard films
structure–property relationship in dual-frequency plasma deposited hard a-C:H films, 275
Heat treatment
field and laboratory corrosion tests in Zn–Ni alloy coatings, 171
Hermetic seal applications
investigation of selected plasma-sprayed coatings for bonding glass to metal in hermetic seal applications, 129
High-temperature oxidation
X-ray photoelectron spectroscopy studies on the surface of NiCoCrAlY coatings before and after high temperaure oxidation, 65
Hydrogen
structure–property relationships in dual-frequency plasma deposited hard a-C:H films, 275

Indium
application of the liquid–metal ion source in thin film deposition, 289
Ion implantation
structure and wear properties of C implanted 304 stainless steel using plasma source ion implantation, 267
Ion implanted films
corrosion behaviour of ion plated and implanted films, 25
Ion plated films
corrosion behaviour or ion plated and implanted films, 25
Iron base hardfacing alloys
performance of wear-resistant Fe base hardfacing alloys in valves operating under prototypical pressurized water reactor conditions, 101

0257–8972/92/$05.00

© 1992 — Elsevier Sequoia. All rights reserved

Laser surface melting
characterization of plasma sprayed layers of fully yttria-stabilized zirconia modified by laser sealing, 75
Lasers
reactive TiN deposition on alloys using laser radiation, 57
Low carbon steel
corrosion protection of TiN-coated low C steel with electroless Ni–P as an interlayer, 93
Lubricants
structural and tribological studies of MoS_2 solid lubricant films having tailored metal-multilayer nanostructures, 13

Macroroughening
thermal shock resistance of TiC coatings plasmas prayed onto macroroughened substrates, 49
Molybdenum
influence of the coating thickness on the cooling rates of plasma-sprayed particles impinging on a substrate, 107
properties of electrodeposited Ni–Mo alloy coatings, 257
Molybdenum desulphide
anisotropy in the compressibility of Mo disulphide up to pressures of 90 kbar, 147
MoS_2 films
structural and tribological studies of MoS_2 solid lubricant films having tailored metal-multilayer nanostructures, 13
Multilayer coatings
wear of cemented carbide cutting inserts with multilayer Ti-based PVD coatings, 161

Ni_3Al
localized corrosion behaviour of Cr- and B-implanted Ni_3Al, 115
Ni-P
corrosion protection of TiN-coated low C steel with electroless Ni–P as an interlayer, 93
sliding wear resistance of tool steel coated with electroless Ni–P and cathodic arc plasma TiN, 87
NiCoCrAlV coatings
X-ray photoelectron spectroscopy studies on the surface of NiCoCrAlY coatings before and after high temperature oxidation, 65
Nickel
a sulfate solution for deposition of Ni–Cr–P amorphous alloys, 203
adhesion and corrosion properties of a new NiZn/ZnCo-coated steel tire cord, 243
electroless deposition of Ni–P alloys with and without the use of superimposed pulsed current, 223
properties of electrodeposited Ni–Mo alloy coatings, 257
wet powder spraying—a process for the production of coatings, 71

Painted steel
electrochemical potential measurement for monitoring underfilm corrosion of painted steel in 3.5% NaCl solution, 185
Phase transition
anisotropy in the compressibility of Mo disulphide up to pressures of 90 kbar, 147
Phosphorus
a sulfate solution for deposition of Ni–Cr–P amorphous alloys, 203
electroless deposition of Ni–P alloys with and without the use of superimposed pulsed current, 223
Physical vapour deposition
corrosion behaviour of physically vapour deposited Al–Zn coatings on 7075 Al alloy, 99
wear of cemented carbide cutting inserts with multilayer Ti-based PVD coatings, 161
Pitting corrosion
localized corrosion behaviour of Cr- and B-implanted Ni_3Al, 115
Plasma deposition
structure–property relationships in dual-frequency plasma deposited hard a-C:H films, 275
Plasma spraying
influence of the coating thickness on the cooling rates of plasma-sprayed particles impinging on a substrate, 107
investigation of selected plasma-sprayed coatings for bonding glass to metal in hermetic seal applications, 129
Plasma transport
plasma transport in a new cathodic arc ion source, 239
Polarization
electrochemical evaluation of the adherence of Zn to Al cathodes, 231
Pressurized water reactor
performance of wear-resistant Fe base hardfacing alloys in valves operating under prototypical pressurized water reactor conditions, 101

Scanning electron microscopy
formability and corrosion resistance of TiN-coated stainless steel sheet, 153
influence of CVD conditions on the structural stability and cracking of Si carbide coatings on C–C composites, 137
Scanning tunnelling microscopy
formability and corrosion resistance of TiN-coated stainless steel sheet, 153
SiC coatings
influence of CVD conditions on the structural stability and cracking of Si carbide coatings on C–C composites, 137
Silicon
effect of Si in steel on the growth of intermetallic phases during hot dipping in a Zn–5%Al melt, 283
Sputtering
interfacial phases and the adhesion of amorphous hydrogenated C films deposited by r.f. CVD onto (100) Si, 121
Steel
structure and wear properties of C implanted 304 stainless steel using plasma source ion implantation, 267
effect of Si in steel on the growth of intermetallic phases during hot dipping in a Zn–5%Al melt, 283
influence of target temperature and dose on metallic strenghtening for Ti implantation into steel, 215
Sulfidation
study of Zn–Ni and Zn–Co alloy coatings electrodeposited on steel strips II: Corrosion, dezincification and sulfidation of the alloy coatings, 35
Superimposed pulsed current
electroless deposition of Ni–P alloys with and without the use of superimposed pulsed current, 223

Tantalum
application of the liquid–metal ion source in thin film deposition, 289
Temperature
influence of target temperature and dose on metallic strengthening for Ti implantation into steel, 215
Thermal conductivity
influence of the coating thickness on the cooling rates of plasma-sprayed particles impinging on a substrate, 107

Thermal shock resistance
thermal shock resistance of TiC coatings plasma sprayed onto macroroughened substrates, 49
Thin films
application of the liquid–metal ion source in thin film deposition, 289
TiC coatings
thermal shock resistance of TiC coatings plasma sprayed onto macroroughened substrates, 49
TiN
corrosion protection of TiN-coated low C steel with electroless Ni–P as an interlayer, 93
sliding wear resistance of tool steel coated with electroless Ni–P and cathodic arc plasma TiN, 87
TiN coatings
formability and corrosion resistance of TiN-coated stainless steel sheet, 153
TiN deposition
reactive TiN deposition on alloys using laser radiation, 57
Titanium
influence of target temperature and dose on metallic strengthening for Ti implantation into steel, 215
Titanium-based coatings
wear of cemented carbide cutting inserts with multilayer Ti-based PVD coatings, 161
Transmission electron microscopy
interfacial phases and the adhesion of amorphous hydrogenated C films deposited by r.f. CVD onto (100) Si, 121
influence of CVD conditions on the structural stability and cracking of Si carbide coatings on C–C composites, 137

Wet powder spraying
wet powder spraying—a process for the production of coatings, 71

X-ray diffraction
influence of CVD conditions on the structural stability and cracking of Si carbide coatings on C–C composites, 137
XPS
X-ray photoelectron spectroscopy studies on the surface of NiCoCrAlY coatings before and after high temperature oxidation, 65

Yttria-stabilized zirconia
characterization of plasma sprayed layers of fully yttria-stabilized zirconia modified by laser sealing, 75

Zinc
adhesion and corrosion properties of a new NiZn/ZnCo-coated steel tire cord, 243
electrochemical evaluation of the adherence of Zn to Al cathodes, 231
effect of Si in steel on the growth of intermetallic phases during hot dipping in a Zn–5%Al melt, 283
Zinc alloy coatings
study of Zn–Ni and Zn–Co alloy coatings electrodeposited on steel strips II: Corrosion, dezincification and sulfidation of the alloy coatings, 35
Zinc-nickel coatings
field and laboratory corrosion tests on Zn–Ni alloy coatings, 171
